

# Time to reset clocks, change alarm batteries

It's that time again when we spring forward in time March 11; it's also a great time to change batteries in smoke detectors.

Working smoke alarms save lives, cutting the risk of dying in a home fire in half. Smoke alarms should be installed and maintained in every home.

Residents should install smoke alarms inside every

bedroom, outside each sleeping area and on every level of the home including the basement. Larger homes may need additional smoke alarms to provide enough protection. For the best protection, interconnect all smoke alarms so when one sounds, they all sound.

Follow these tips to ensure smoke alarms provide the best benefit:

- Install away from the kitchen to prevent false alarms.

- Generally, they should be at least 10 feet from a cooking appliance.

- Replace all smoke alarms when they are 10 years old.

- Test smoke alarms at least once a month using the test button.

- Immediately replace any smoke alarm that does not respond properly when tested.

- Dust or vacuum smoke alarms annually and/or whenever the battery is changed. Follow the manufacturer's instructions for cleaning.
