

Ladies and Gentlemen,

I wanted to share some important information about the Comp TIA certifications, which are being integrated into our WOES. Please hold on to this information and realize that it not only benefits you, but is crucially important to anyone you may be considering as a future 140A or recommending through accessions. Addressed in this E-mail are all 140A's, as well as our latest selectee's who have not yet entered WOBC, I recommend you eight pay very close attention to the information below.

1. WOBC will attend A+ and Network+  
2. WOAC will attend Security+ (If you did not get A+ and NET+ in WOBC, you will still get SEC+ in WOAC)

3. On the 140A Knowledge Center, [Civilian IT Certifications] folder is populated, within it you will see A+, NET+, SEC+. Everything we get in the school house will be populated within these folders as a read ahead.

4. Skill Port - <https://usarmy.skillport.com/skillportfe/custom/login/usarmy/login.action> you can find modules on any of the three certification courses in skill port. It is HIGHLY RECOMMENDED you complete skill port before attending your PME.

5. Upon completing Skill Port you will be directed to <https://dod.measureup.com/web/login.php> to take an assessment test, your goal should be 80% on the measureup exam.

6. Another excellent resource we have found at the school house is <http://www.professormesser.com> , you will find great written, video, and podcast references to further enable your studies.

7. We have also found a useful app on google+ and the Apply Store, called CompTIA Security+ SY0-401. This app is by Konnect L.L.C who also has a grouped app deal to get all three courses together. I can't speak on all three but the Sec + was very useful in preparing for the exam. (the app is not required, nor am I sponsored by or promoting if for any other reason than my own experience)

8. Finally, <https://www.comptia.org/> is full of additional useful information to guide and educated you on the concept of their industry accepted certifications.

\*\*\* Completing any of these courses as refresher training in Skill Port once every 3 years, as of now, does fulfill your Continued Education Units required to maintain your certs.

Additional note: As social media has become the preferred method of communication in 2016, as such, for anyone not aware there is a Facebook page that many within our cohort have turned to for assistance in troubleshooting, professional mentorship, or personal guidance.

Please follow "140A C2 Integrator" if you're looking for a forum to seek help, share information, or assist others!
