

- **ISSUE:** Center Point Energy needs to repair a damaged 8" natural gas line located directly on the north side of Roger's Lane, between Sheridan Rd and Fort Sill Blvd.
- **DATE:** SUN 17 FEB 2013 (post pone till SUN 24 FEB 2013 if bad weather.)
- **TIME:** 0400 to 1800
- **IMPACTS:**
 - 1) All traffic driving west bound on Roger's Lane, arriving from east of Fort Sill Blvd, will be diverted to the off ramp, coming to a stop south of the Fort Sill Blvd old Guard House. At this point, the majority will turn south into Lawton.
 - 2) Traffic leaving Scott Gate intending to go west will have to go straight south, due to that west bound ramp being blocked.
 - 3) Those leaving Bentley Gate, intending to turn west, will have to wait their turn to turn west as the detoured Roger's Lane traffic will be accessing the same ramp to go west on Roger's Lane.
