

Example Topics for AGO Problem of Practice

Home-Station Training (Individual and Collective)

- Build and Maintain Relationships
- Capabilities and Doctrine (Does doctrine support operational requirements?)
- CTC Training Opportunities
- Digital Sustainment Training
- Realistic AGO Training (CALFEX/GUNNERY)
- Command Support
- SUAS/TUAS Integration
- Joint / Multi-National Coordination

AGO Planning

- Determine integrated airspace user requirements
- Develop Airspace Usage Priorities
- Develop a Unit Airspace Plan
- Coordinate air traffic services, sensor emplacement, and data links.
- Determine combat identification authority and procedures for airspace users.
- Develop rules of engagement and early warning procedures for air defense operations in the area of operations.
- Determine reporting requirements and monitoring methods for manual reporting.
- Integrate airspace use within the area of operations.
- Develop airspace coordinating measures to support planned operations.
- Develop the airspace annex.

AGO Execution

- Process airspace orders and directives.
- Manage airspace control information displays.
- Determine track identification for airspace users.
- Monitor assigned airspace and airspace users within assigned area of operations.
- Resolve real-time conflicts for airspace users within the area of operations.

Previous Classes

- Shared Understanding, Integrated SOPs, Unit Training Events (CPT, AV)
- Development of the UAP (CW4, AV)
- Digital Integration / Home Station Training (SPC, 14G)
- ADAM/BAE in Small Wars (MAJ, AV)
- Resolving Conflicts for Airspace Users (CW4, AV)
- Build and Maintain Relationships (MSG, 14Z)
